Service Design

Essi Aittamaa

Project researcher and doctoral student

Who am I

- Creative – Screenwriter, Producer
- Storytelling in audio, VR, film...
- Concept design, Project management, production and marketing for: Events, festivals, societal innovation process and platform...
- MAs from Aalto University and University of Maastricht
- PhD in Software Engineering
- Creating stories and content not for "distant" screen but for the "real world"
- Conversational Agents (chatbots, digital characters, robots) which embody brand
- Senior Lecturer at HUMAK and guest lecturing in other Unis and Unis of Applied Sciences
- LUT TA for Service Design and User Interfaces and Usability

General about Tutorials

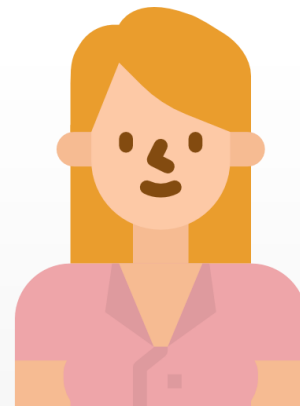

- The sessions strengthen your learning process. Theory put to practise!
- Mostly in person sessions, with some exceptions. Many exercises require work with papers, markers, post-it notes, legos, in group, around one table -) you should be in class ;)
- We do exercises during the class and then return them in Moodle. If you submit all the tutorial exercises you will get an extra 5% of the final grade covered. Check the return deadlines and stick to them!
- We start at 10 AM sharp – please be on time and focus on the session at hand. 2x 45 minutes.

General about Tutorials

- Feel free to comment, ask questions, make suggestions! We are here for your learning.
- Safe and welcoming space – be respectful of each other!
- Be brave, don't be afraid to share your thoughts and ideas.
- This is the place to play, explore and have fun. Much easier at Uni than at the office!
- AI – if you use it use it wisely. Develop your own brain and your own skills!

Form a group

- Create a group for the semester:
 - min. students allowed per group: 3, max. allowed: 5
- Organize yourselves and involve students that might not be in Finland (yet)
- Once you decide on your group, go to Moodle > this week's section > Form a group
- Join a group only if you have agreed with others
- It might be a good idea to discuss already a bit on your working preferences (such as, I would like to meet live/online, I cannot work during the weekends)

Tutorial 1

What is a service?

Recap

- Many definitions of what is a service
- Services are extremely diverse
- Service offerings and 3 key spheres: care, access, response
- Service vs. product
- Services can exist around products
- Many businesses interested in servitization (remember the move from the plate of spaghetti made by a chef to being able to eat in your own home thanks to a service)
- Product-service hybrids

Exercise: Product or service?

- Work as a group 3-5 persons
- Refer to Monday's lecture if needed (the slides are in Moodle)

Exercise: Product or service?

STEP 1: BROWSE EXAMPLES

- Open the Examples of Service or Product pdf file in Moodle and choose an example

STEP 2: CHOSE AN EXAMPLE AND TELL ESSI

- Each group needs to work on a different example! If someone was quicker, preferably choose another example
- **5 minutes**

Exercise: Product or service?

STEP 3: WORK ON YOUR CHOSEN EXAMPLE (40 minutes)

- Read the description of your chosen example and discuss:
 - Is what is described a service or a product? Or a service-product hybrid?
 - Is it tangible or intangible?
 - Does it help the user to achieve a goal? Which one and how?
- a) If it is a service, answer the following:
 - Is it: Hands-on? Technology-mediated? Simple or complex? Local or geographically distributed? Does it require specific skill levels?
 - What is the service offering? Is it related to care, access, or response? Or any combination of these?
- b) If it is a product, answer the following:
 - How could it be servitized and turned into a service-product hybrid?
 - What would be the service offering then? Is it related to care, access, or response? Or any combination of these?
- c) If it is a service-product hybrid, answer the following:
 - What is the service part and what is the product part? What goal does each part help achieve?
 - What is the service offering? Is it related to care, access, or response? or any combination of these?

Exercise: Product or service?

STEP 4: BROWSE EXAMPLES

15 minutes

- Present your example, argumentation, and answers to the questions to another group or student

10 minutes

- Plenary discussion

SUBMISSION Product or service?

REVIEW AND SUBMIT TO MOODLE

Submit to Moodle a PDF file containing the following:

- Name of your example
- Is it a service, product, or a service-product hybrid? Why?
- Your answers to the questions you discussed today

Due: Wednesday, 9 September 2026, 11:59 PM

Next sessions

9.9. at 10 AM ONLINE session

- The link will be in Moodle on Monday/Tuesday.

16.9. at 10 AM Service Safari groupwork session

- This time is reserved for you to do the task
- The content of the task will be introduced in the online session 9.9.
