Service Design

Essi Aittamaa

Project researcher and doctoral student

Tutorial 7

Mini design challenge

AIM OF THE TUTORIAL

- Practice quick design work without real life contraints
- Practice quick ideation of a new service, focusing on a) value proposition, b) service offering, c) user experience, d) touchpoints
- Practice quick iterations of divergent and convergent thinking (double diamond)
- Open up spontaneous creativity by not allowing time to think too much!

GROUP WORK

- Work in your own group (If you are alone, form a new group or join another)
- Each group works around one table
- You are going to work on two types of creative processes: brainstorming and 10 + 10 idea generation

- The submission on Moodle will be done individually: you will submit pictures of the outcomes of your groupwork and you will individually write a short paragraph

- If you are unable to work in a group because you are not in class today, you can do the exercise on your own and submit, but you will need to write an extra paragraph.

MINI DESIGN CHALLENGE: NORMAL BRAINSTORM

- You are hired by the Finnish aviation company Finnair as service designers to develop a novel service experience for travellers.

- Step 1: Brainstorm for 20 minutes:
  a) What kind of novel user experience you aim to deliver?
  b) What would be the value proposition?
  c) What would be the core service offering?

- Make use of your own experience in air travel or something you have heard or read about!
- It is OK to go crazy with ideas!
- Divergent thinking!

MINI DESIGN CHALLENGE: NORMAL BRAINSTORM

- Core service offering – What you actually do, what the service is about
- Value proposition – Why customers should choose you, what value you offer them
- Service experience promise – How customers will feel (and be treated) when engaging with your service, what is the user experience

MINI DESIGN CHALLENGE: NORMAL BRAINSTORM

- Step 2: Take 10 minutes to make a decision based on your brainstorming and write down or draw on the provided A4 papers your a) core service offering, b) value proposition, and c) service experience promise
- Convergent thinking!

MINI DESIGN CHALLENGE: 10+10 IDEATION

- Take more A4 papers and markers
- You will go through 9 steps facilitated by Essi
- Essi will take time and will be very strict: when she say stop, you have to stop and move the next step! It is the point of the exercise!

MINI DESIGN CHALLENGE: 10+10 IDEATION

- You are still hired by the Finnish aviation company Finnair as service designers to develop a novel service experience for travellers
- You start with the value proposition, service offering and service experience you ideated before
- Now, you will **individually** ideate what touchpoints are needed to deliver the experience and value for the traveller

- Touchpoint – a moment, channel or place where a customer comes in contact with your brand

10 + 10 STEP 1

- Each one of you takes one A4 paper and a marker
- 3 minutes:
- Quickly draw, individually and silently, one rough, simple sketch of a touchpoint idea for your group's new air travel experience for Finnair, on one A4 paper.

--- THIS IS NOT A DRAWING COMPETITION! IT IS OK TO ADD SOME WORDS! DON'T OVER THINK IT---

10 + 10 STEP 2

- 3 minutes:
- Take another A4 paper and draw A NEW sketch of ANOTHER touchpoint idea for your group's new air travel experience for Finnair.

--- THIS IS NOT A DRAWING COMPETITION! IT IS OK TO ADD SOME WORDS! DON'T OVER THINK IT---

10 + 10 STEP 3

- In the next 10 minutes:
- Back to groupwork!
- Put all your drawings in the center of the table
- Take turns to each quickly explain your two ideas
- After each explanation you can mark the drawing with a * to indicate whether it is INTERESTING. The idea does not need to be feasible and can indeed be completely mad!

10 + 10 STEP 4

- In the next 4 minutes:
- Decide together on one sketch you want to keep and put it at the center of the table
- Choose the sketch because it can be further elaborated on, or because it is interesting, or fun, or just simply different!

10 + 10 STEP 5

- In the next 2 steps you will draw again!

- 2 minutes:
- Take one new A4 paper and draw a sketch that is a variation on the idea placed at the center of the table

--- THIS IS NOT A DRAWING COMPETITION! IT IS OK TO ADD SOME WORDS! DON'T OVER THINK IT---

Definition of variation -) as in alteration, the act, process, or result of making different https://www.merriam-webster.com/thesaurus/variation

10 + 10 STEP 6

- 2 minutes:
- Take another A4 paper and draws A NEW variation on the idea placed at the center of the table

--- THIS IS NOT A DRAWING COMPETITION! IT IS OK TO ADD SOME WORDS! DON'T OVER THINK IT---

10 + 10 STEP 7

- In the next 10 minutes:
- Put all your NEW drawings at the center of the table
- Take turns to each quickly explain your ideas by showing your sketch and elaborating on it.
- After each explanation you can mark the drawing with a * to indicate whether it has potential or is interesting

10 + 10 STEP 8

- In the next 4 minutes:
- Decide together if there is one sketch you prefer

10 + 10 STEP 9

- You now have around 20 sketches (if you are a group of 5 – hence the name 10 + 10) of ideas related to a design challenge!
- Each one of the group members choose their favorite idea and takes a picture of it

THIS TUTORIAL AND THE DOUBLE DIAMOND

- 2 iterations of a “diamond”
- Diverging with brainstorming and exploring many ideas
- Converging with choosing the best
- But we did not move forward beyond the quick touchpoint ideas
- And we didn’t do any research to start with!

SUBMIT TO MOODLE AS ONE PDF

- Submit individually as a PDF to Moodle:
- 1. 2. 3. Your own text explaining the value proposition, core offering and service experience promise of your group's chosen proposed idea
- Your picture of your favourite touchpoint explaining why you chose it
- A short paragraph explaining which one of the two design methods did you prefer: normal brainstorming or 10 + 10? Why?
- DL 21.10. 23:59

- Note: if you did the exercise on your own because you were not in class today, write an extra paragraph reflecting on the challenges or benefits of ideating on your own.
